

## Bug Report 1

**Bug ID:** BR-001

**Title:** Login fails with correct email and password

**Test Condition:** Registered user exists in the system

**Test Steps:**

1. Navigate to `http://automationexercise.com`
2. Click *Signup / Login*
3. Enter registered email and password
4. Click *Login*

**Test Input:**

- Email: `user123@test.com`
- Password: `password123`

**Expected Result:**

- User should log in successfully, and “Logged in as username” should be displayed.

**Actual Result:**

- Error message displayed: “*Your email or password is incorrect!*”

**Prerequisites:**

- Account must exist.

**Technique Used:**

- Positive testing.

## Bug Report 2

**Bug ID:** BR-002

**Title:** Element click intercepted by Google AdSense iframe

**Test Condition:** User clicks on product details or add-to-cart button

**Test Steps:**

1. Navigate to homepage
2. Scroll to product list
3. Click on *View Product* or *Add to Cart*

**Expected Result:**

- Product details page opens or product is added to cart.

**Actual Result:**

- Selenium throws `ElementClickInterceptedException`.
- Overlay ad iframe (id=`aswift_3`) blocked the click.

**Prerequisites:**

- Google ads must be loaded on page.

**Technique Used:**

- Functional UI testing.

## Bug Report 3

**Bug ID:** BR-003

**Title:** Cart page sometimes empty after adding products

**Test Condition:** User adds products and navigates to cart

**Test Steps:**

1. Navigate to homepage
2. Add a product to cart
3. Click *View Cart*

**Expected Result:**

- Product should be visible in cart.

**Actual Result:**

- Cart sometimes appears empty.
- Modal popup (*Continue Shopping / View Cart*) intercepted flow inconsistently.

**Prerequisites:**

- At least one product added.

**Technique Used:**

- End-to-end functional testing.
